# OUR FIRST-CLASS EMPLOYEES

---

## **The people behind the brand.**

An excellent motorhome cannot be created without an excellent team. From decal specialists to joiners, from construction engineers to mechatronics and design engineers, we are incredibly proud of our team of professionals and of each individual MORELO that rolls out of our plant.

# WHAT IS AT THE CORE OF MORELO?

**MORELO stands for first-class motorhomes that are among the best in the world.** A MORELO is always a statement of wanderlust, excellent comfort and superior quality. A MORELO means the feeling of being at home anywhere in the world. Or, in short, a MORELO is something truly special – Made in Germany.

This philosophy has helped us transform into one of the most successful luxury motorhome manufacturers in Europe in just a few short years. The friendly atmosphere, lively individuality, our determination, and our many years of experience all contribute to strengthening the brand. And while we may not have entirely expected this level of success in such a short time when we set out for the Caravan Salon trade fair in 2010 with just a few prototypes, we always had faith in our approach.

The combination of these factors is what makes MORELO truly special. But this alone is not what makes us unique. We did not set out to build motorhomes to get rich - we started doing this because there is nothing else we would rather do. After all, there is nothing better than to pack your belongings and get away for a few days - or, even better, a few weeks - and to travel through Scandinavia, discover southern Italy or take a trip to Portugal.

**This love for motorhomes is within us and in every MORELO.**

This overall picture describes what makes us unique.

MORELO brand experience world:  
That's what our customers should  
feel as often as possible.

This sets us apart.

This is who we are.

MORELO Product Experience:  
This is what our customers  
should find in all their facets.

We strive to ensure that everything  
we do meets this overall picture.

### EXPERT ADVICE

## KEEP GOING, WHATEVER THE TERRAIN

### A PERFECT COMBINATION: DIFFERENTIAL LOCK AND TRACTION+

The Daily HI-MATIC is the only chassis in its class to use rear-wheel drive, which combines the comfort and safety of a mechanical differential lock and Traction+.

The mechanical differential lock ensures you can continue your journey on tricky surfaces by transferring the entire torque to the wheel with grip. Traction+ is deployed as an additional function on routes with different road surfaces and particularly winding roads. In contrast to the mechanical differential lock, this function can also remain active on grippy surfaces.

The combination ensures a safe and relaxed journey at all times.

- + Linked to the chassis frame
- + Reduced damage from accidents

### TELMA RETARDER

The wear-free optional eddy-current retarder handles up to 90 percent of all braking operations. It effectively relieves the strain on the main brakes and minimises wear. Relaxed driving with a solid feeling of additional safety.

### WIDE AXLE
