

CHECKLIST WINTER SUITABILITY

The cold season places very special demands on a motorhome. This is because low temperatures and difficult road conditions require special measures. This applies to winter campers as well as those who put their motorhome into hibernation.

- 1. winter tyres with sufficient tread and air pressure
- 2. fill up antifreeze for windscreen wiper system
- 3. check oil level
- 4. check windscreen wiper blades
- 5. check filling level of heater and add antifreeze
- 6. change engine heat exchanger to winter operation (red)
- 7. use winter air cover for absorber refrigerator
- 8. deep clean (seals of windows, rooflights and flaps)
- 9. switch to EisEx for safe gas supply

NOTES
